

To Do List/Task Allocation:

How the items in the array are rearranged to sort them in order? (explanation of the algorithm)	Daniel Huynh
How are the items swapped? Algorithm introduction	David
Examples of the best, worst, and average number of comparisons and passes	James
Formulas for the number of passes, comparisons are given N number of items in an array?	Aiden, James
Time complexity: Big O notation	Aiden
How would you creatively, visually teach this method to the class? (visuals, and samples)	Ali
In-class questions, interactive activities, homework	Everyone
Provide a note-taking template and an activity for them to do in class	Everyone
